### THIS & THAT

\*Did you know?

June or 'Junius' in the past, was originally the fourth month of the year. Before Julius Caesar came to power, the calendar year only had 10 months. In 46 BC he created the Julian calendar by adding two more months to the year, which made June the sixth month.

Ever wonder why June is such a popular month for weddings, apart from the good weather? Some say that the name of the month comes from Juno, the Roman goddess of marriage.

\*The Weir Community Center is getting closer to being completed, the septic system has been approved by Williamson County and will start very soon.....rain permitting.

### PRAYERS & SYMPATHIES

#### *Prayer for a Friend*

Stores don't sell,  
I must confess,  
the joys of life  
that cheer and bless,  
but friends and prayers  
are priceless treasures  
beyond all monetary measures -  
and so, my friend,  
I say a prayer  
that God will keep you  
in His care.

### ASTROLOGY

June 2021

Flower: Rose

Birthstone: Pearl & Moonstone

Astrological Sign: Gemini (May 22 – June 21)

Horoscope: There's for sure plenty to talk about this year, Gemini! 2021 is a highly stimulating year for your creative side. You are able to feel more aligned with your highest good and can even make some pretty fantastic new friends along the way. You might actually be the go-to person when things get a little rocky, mainly because you adjust so easily and quickly to things and are able to see the humor in almost any situation.

One important piece of the 2021 puzzle is to really consider the transition period of your birthday months. You might be a little caught up during this year's Mercury retrograde cycles, which all take place in air signs. One of the most important, for you, occurs on May 29, following a transformative total lunar eclipse in your opposing sign of Sagittarius. This is a vibe that will definitely have you rethinking a lot of different pieces of the story. And although it can be a highly enlightening time when it comes to all aspects of your life, there is still much work to be done through the summer. Especially because you are also met with an annular solar eclipse on June 10—at the same time Mercury continues a tricky retrograde cycle in your sign until June 22.
